---

## Experience

---

### Cinchapi / Software Engineer

Aug 2017 - Present, REMOTE

- Constructed backend features such as a database query language for a document-graph database
- Built and deployed a natural language interface to a data analytics system that employed natural language processing techniques including deep learning
- Designed and implemented a data extraction system using computer vision technologies such as optical character recognition to extract structured information from unstructured data such as pdfs, word documents, etc.

### Cinchapi / Intern

Jun 2016 - Dec 2016, REMOTE

- Developed a prototype natural language interface to a data analytics system

---

## Education

---

### University of Central Florida / M.S. in Computer Science

Aug 2015 - July 2017, Orlando, Florida

Specialization: Artificial Intelligence

### Florida State University / B.S. in Computer Science

Aug 2011 - May 2015, Tallahassee, Florida

FSU Honors Program

Minor: Mathematics, Physics

---

## Technical Skills

<b>Programming Languages</b>	C/C++, Python, Java, MatLab, Solidity	<b>Paradigms</b>	OOP, Functional, Logical, Imperative
<b>Web Development</b>	HTML, CSS, PHP, Javascript, Laravel, Alpine.js, Vite, Vercel, Node.js	<b>Blockchain</b>	Remix, metamask
<b>Databases</b>	MySQL, SQLite, MongoDB	<b>Deep Learning</b>	Tensorflow, PyTorch
<b>Version Control</b>	Git, Mercurial	<b>Cloud</b>	AWS
<b>Practices</b>	Test Driven Development (TDD), Agile Methodology	<b>Operating Systems</b>	Windows, Android, Linux (Ubuntu, Debian, CentOS, Linux, Mint, Kali, Tails)
